

OAKLEY® SI BALLISTIC RX

TO ADDRESS THE EVOLVING NEEDS OF MILITARY, LAW ENFORCEMENT AND FIRST RESPONDER PRESCRIPTION WEARERS, OAKLEY® SI IS THE FIRST TO OFFER AN ALL-IN-ONE BALLISTIC PRESCRIPTION SOLUTION.

When every mission demands uncompromising readiness, your eyewear must hold up under real-world threats. Ballistic-rated systems are tested to withstand high-velocity fragments and impacts, delivering performance beyond standard safety glasses.

With Oakley® SI Ballistic RX lenses, you get optical clarity, rugged impact resistance and mission-ready fit – all wrapped in one platform. Because when your eyes are protected, you stay focused.

OAKLEY® SI BALLISTIC RX LENSES MEET THE MIL-PRF-32432A BALLISTIC IMPACT REQUIREMENTS

INTRODUCING OAKLEY® SI BALLISTIC RX – A GROUNDBREAKING ADVANCEMENT IN PROTECTIVE EYEWEAR.

Engineered to solve the limitations of conventional ballistic prescription solutions, Oakley® SI Ballistic RX is the first primary-RX technology that integrates your prescription directly into the ballistic protective lens. By eliminating bulky RX lens carrier inserts, this innovation delivers a wider field of view, uncompromised protection, and the superior optical clarity Oakley® is known for – all in a streamlined, mission-ready design.

Current power range is +3.00 to -3.00 with possible add of 2.00 in cylinder at negative for Total Power range of +3.00 to -5.00.

OAKLEY® SI BALLISTIC RX IS AVAILABLE IN SI BALLISTIC HNBL AND SI BALLISTIC HNBL S. THEIR LOW-PROFILE DESIGN AND EASY LENS EXCHANGE ALLOWS YOU TO SEAMLESSLY TRANSITION FROM ON-DUTY TO OFF-DUTY.

- Also available in HNBL S, a reduced size to better fit narrow face shapes
- Thin stem technology for compatibility with over-ear hearing protection and communication systems
- Durability and comfort of lightweight O-Matter™ frame material
- Unobtanium® nose pad and Three-Point Fit system helps keep eyewear securely in place
- Features Switchlock Technology quick, tool-free, lens change system making lens changing fast and hassle-free
- Oakley® High Definition Optics® (HDO®) and Plutonite lenses provide optical clarity and UVA and UVB protection up to 450nm
- Advanced anti-fog coating
- Meets or exceeds ANSI Z87.1 (high mass and high velocity impact requirements) and MIL-PRF-31013
- USA Made
